

Roles and Responsibilities- Practice Nurse

The Registered Nurse (RN) plays a critical role in providing high-quality patient care within our healthcare facility. The RN will be responsible for assessing, planning, implementing, and evaluating patient care in collaboration with the healthcare team. This position requires excellent clinical skills, strong communication abilities, and a commitment to patient safety and well-being.

Key Responsibilities:

1. Patient Assessment:

- Conduct comprehensive patient assessments, including physical, psychological, and social factors.
- Document assessment findings accurately and thoroughly in the patient's medical record.

2. Care Planning:

- Develop individualized care plans based on patient assessments, medical history, and treatment goals.
- Collaborate with the healthcare team to establish and revise care plans as needed.

3. Patient Care:

- Administer medications, treatments, and procedures following established protocols.
- Monitor and record vital signs, symptoms, and reactions to treatments.
- Provide compassionate and culturally sensitive care to patients and their families.
- Educate patients and families on health conditions, treatments, and self-care.

4. Patient Safety:

- Maintain a safe and clean patient care environment.
- Adhere to infection control practices and safety protocols.
- Recognize and respond to changes in patient condition promptly.
- Implement fall prevention measures and other safety precautions.

5. Collaboration:

- Collaborate effectively with physicians, nurse practitioners, therapists, and other healthcare professionals.
- Participate in multidisciplinary care conferences and rounds.

6. Documentation:

- Maintain accurate and up-to-date patient records and charts.
- Complete all required documentation in accordance with healthcare policies and regulatory standards.

7. **Compliance:**

- Adhere to all legal, ethical, and professional standards of nursing practice.
- Stay current with nursing research, best practices, and regulatory requirements.

8. **Emergency Response:**

- Respond to medical emergencies and initiate appropriate interventions.

Follow emergency response protocols and procedure
